How much does a private psychiatric assessment cost uk

Psychiatrist gibraltar. Private psychiatry assessment. How much does a private psychiatric assessment cost. How do i get a private psychiatric assessment uk. How do i get a private mental health assessment.

We provide a comprehensive range of private psychiatric assessments, treatments, and medical report services. Learn more about our private mental health offerings from Consultant Psychiatrist Dr Iqbal Mohiuddin at Iam Psychiatry. Generally, you'll require a one-hour assessment, which costs £360.00 and must be paid in advance. This fee includes a written opinion or assessment letter, suggested treatment plan, and formal diagnosis when necessary. Additional fees may apply after the assessment for services like medication prescription or extra consultation time. You can also exercise your Right to Choose and schedule an appointment with us as we're a CQC-registered provider of NHS services. Psychiatry-UK has contracts with ICBs and NHS England for Adult ADHD assessments and treatment in England. # * 1-hour online assessment: £360.00 * Travel Support Letter: £20.00 per letter * Each additional minute of consultation time beyond the first hour: £6.00 * Time spent communicating or reviewing notes (at clinician's discretion): £6.00 * Private Prescription (follow-up appointment required after 6 weeks): £25.00 (plus medication cost at local pharmacy) * Perinatal Consultation (minimum fee): £360.00 * Alcohol and Substance Misuse Consultation (minimum fee): £360.00 * 30-minute follow-up appointment: £180.00 (includes letter to GP) * Mandatory Follow-Up Meeting (online): carried out as scheduled Consultation with Psychiatry-UK Consultant: £360 (includes online assessment, diagnosis, written report); £540/£700 for initial discussion/adHD appointment (90 minutes), or £180/£360 for follow-up appointments (30/60 minutes). Additional consultation time: £6 per minute. Medication and titration fees apply separately (£70-£150/month; £80/month). Private prescriptions: £25 (ADHD/non-ADHD medication) and follow-up appointments (£180). Travel letters: £20 (standard)/£50 (detailed), while support letters for university/employment are free (standard) or £20/£50 (detailed). Before your appointment, it's helpful to review any paperwork or questionnaires you receive in advance. Also, clearly communicate which questions you want answered during the consultation. For extended time spent with the psychiatrist beyond the initial 90 minutes, charges apply at £180 per additional 30 minutes or £6 per minute. In some cases, extra time may be needed for communication or reviewing notes, but this is at the clinician's discretion. Most adults typically stabilize on treatment within 4-8 weeks. If adjustments are necessary due to side effects or ineffective treatment, the titration process may take up to 12 weeks in adults and around 3 months for children on average. **(What is titration?)** While we aim to complete your assessment within the initial 90 minutes, sometimes it may take longer to thoroughly explore symptoms and history for an accurate diagnosis. Your cooperation can be helpful by completing all paperwork and questionnaires ahead of time and clarifying what questions you'd like answered during the appointment. Additional time spent with the psychiatrist is charged as outlined above. In some cases, a deposit may be required, especially for Perinatal and Alcohol/Substance misuse consultations++.
